This application contains claims 1-5 are drawn to an invention nonelected with traverse in Paper No. 5. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-11, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Indig (1999) reference or the Indig et al. (2000) reference of record for the reasons fully set forth in paper no.11, pages 2 and 3.

Applicant's remarks are noted but the Indig et al reference on page 91, col.1, lines 31 to 32 teach the "irradiated for up to 90 minutes" step. Moreover, applicant on page 11, lines 14-18 teach the same two banks of tubular fluorescent light that appear in the reference on page 91, col.1, lines 29 to 31 for the time of up to 90 minutes. Clearly, this reference would read on the invention as now being claimed.
